## The Cornell Note-taking System

2 1/2"	6"
	Notetaking Column
Cue Column	1. <b>Record</b> : During the lecture, use the notetaking column to record the lecture using telegraphic sentences.
	2. Questions: As soon after class as possible, formulate questions based on the notes in the right-hand column. Writing questions helps to clarify meanings, reveal relationships, establish continuity, and strengthen memory. Also, the writing of questions sets up a perfect stage for exam-studying later.
	3. <b>Recite</b> : Cover the notetaking column with a sheet of paper. Then, looking at the questions or cue-words in the question and cue column only, say aloud, in your own words, the answers to the questions, facts, or ideas indicated by the cue-words.
	4. <b>Reflect</b> : Reflect on the material by asking yourself questions, for example: "What's the significance of these facts? What principle are they based on? How can I apply them? How do they fit in with what I already know? What's beyond them?
	5. <b>Review</b> : Spend at least ten minutes every week reviewing all your previous notes. If you do, you'll retain a great deal for current use, as well as, for the exam.
∧ 	Summary
2" After class, use this space at the bottom of each page to summarize the notes on that page.
